## The Best Real Estate Investment in California

**L**OOK at the picture—STUDY IT CAREFULLY—it tells a great deal to the man who THINKS and OBSERVES. Here is a great DEEP WATER CANAL extending inland from the Bay of San Francisco to a point equidistant from the two built-up sections of fast-growing Richmond, California.

The Canal will accommodate the ferry boats from San Francisco, and great ocean going vessels that will dock along side the tracks of three transcontinental railroads—the Santa Fe, the Southern Pacific and the new Western Pacific. At the point where the Canal ends is the "Heart of Richmond," which is to be the active business center of this city of 10,000 population.

To-day you can buy property in this "Heart" for as low as \$18 per front foot, on easy terms—10 per cent down and only 1 per cent of the balance a month—no interest, no taxes.

The business property of other cities with 10,000 population is worth from \$500 to \$1000 a front foot. In Seattle to-day lots 50x100 feet located on the water front and not yet filled in, cannot be bought for less than \$10,000 to \$20,000. In Richmond you can get water-front property for as low as \$900 a lot. Buy now, hold on to your property—it will soon bring you an income, or you can sell at a great advance in price.

## PREFACE

---

In presenting this, our first Directory of Contra Costa County, and the second of Richmond, we have endeavored to make it as complete and correct as possible, as no expense has been spared to this end.

This Directory gives the exact occupation or business of every adult person, as far as it was possible to get this information.

The canvass for names has been thorough as every house and place of business has been visited.

This volume contains about 11,000 names, and as far as possible all names of transients have been eliminated.

A copy of this Directory will be placed in the library of the California Promotion Committee offices in San Francisco and New York.

We wish to express our sincere thanks for the patronage bestowed upon the work and promise as we publish each succeeding directory of Contra Costa County, we will always do our utmost to bring it to a high standard.

Respectfully,

DIRECTORY PUBLISHING CO.,

M. Cohen, Manager.

# CONTRA COSTA COUNTY

---

Contra Costa County has been exceedingly modest in permitting her resources, material progress and achievements to be made known, but little advertising having been done. But the advantages of her geographical position and facilities afforded by her water front, productiveness of her soil, nearness to market, unsurpassed transportation facilities, wide variety of products, and wonderful strides as a manufacturing center are now attracting the manufacturer, capitalist, home-seeker, professional man, farmer and wage earner, for all of whom equal advantages are offered.

Contra Costa County is the natural as well as the adopted gateway to the great valleys of California.

The great transcontinental railroads all pass through Contra Costa County. Thus it will be seen that the natural gateway to the interior of our great State is through Contra Costa by land and through the waters that wash her northern shore by water, thus justly entitling Contra Costa to the claim of being the Gateway of California.

No other county in our great State can offer as good locations for factories as Contra Costa. We have seventy miles of water front nearly all of which is upon deep water navigable by all vessels engaged in commerce.

The Southern Pacific and Atchison Topeka & Santa Fe Railways furnish transportation by rail while numerous lines of steamers compete for the trade by water.

These deep water vessels bring the raw products to the different factories along our water front and take away the product. Many ships may be seen any day loading wheat, barley, etc., at our warehouses.

# RICHMOND

---

**R**ICHMOND known all over the Pacific Coast and through the Middle West and Eastern States as "The Pittsburg of the West," is one of the marvels of this marvelous country bordering on the Pacific. It was founded in the year 1900, and is directly attributable primarily to the Atchison, Topeka and Santa Fe railroad making this point about that time its Pacific Coast terminal. Shortly afterward the Standard Oil Company established its headquarters here and built one of the largest refineries in the world and began business under the name and style of the Pacific Coast Oil Company. Later, however, the name of the concern was changed to the "Standard Oil Company," its rightful appellation.

All of which accounts for the existence of one of the most thrifty and progressive cities on the Coast at this time. We have other manufacturing industries here, it is true, but to these two factors—the Standard Oil Co. and the Santa Fe railroad—Richmond owes its present status and being.

No better location for a great city can well be imagined than here. The city is built on the east side of San Francisco bay, directly opposite the Golden Gate, celebrated throughout the entire world for its beauty and grandeur. It is on the "continent" side, so to speak, and this means that here the two methods of transportation—water and rail—meet, thus insuring cheap rates to the shipper and no loss of time, a point that is not to be lost sight of in this age of rapid transit, when a day or even an hour oftentimes means the loss or gain of many dollars to the manufacturer and shipper.

## **SUPERB HARBOR FACILITIES.**

Richmond has fifteen miles of deep water front, along which at any time large ocean going vessels can moor almost to the very shore and cargoes discharged or taken aboard without the expense of unwieldy and expensive wharf building.

This deep water has been maintained since the geodetic surveys were made in these waters. The water is from forty to fifty deep a hundred feet from the shore along the entire distance and is amply protected by headlands from the violence of winds and atmospheric disturbances, making it unequalled from a shipping standpoint to any harbor on the Pacific seaboard. Not only is it convenient to water shipping, but two transcontinental railroads, the Southern Pacific and Atchison, Topeka and Santa Fe, skirt the entire distance, making it accessible to all points north, south and east. The location is ideal from the standpoint of commerce, and nature could not be improved upon by any arrangement of land and sea that can be conceived by human ken.

Martinez The county seat of Contra Costa County, situated on the Southern Pacific Railroad, 36 miles from San Francisco, is one of the most attractively located towns in the county, both for residence and business. It is a very important point, on account of its being the county seat. Martinez has a population of over 2,000 inhabitants and has modern stores, hotels and other public buildings. The county court house is one of the finest in the State built of cut stone with a beautiful plaza surrounding it. The Supervisors are to be congratulated on this work for if there was one thing needed in the county it was a new court house.

ANTIOCH

165

Antioch, Contra Costa County, is situated on the Southern Pacific, the Santa Fe, and on the San Joaquin river, three miles above the junction of the Sacramento and San Joaquin rivers, and has every facility for the transportation of freight and passengers and offers unexcelled advantages for manufacturing industries of all kinds. The city contains a population of about 2,000 and is one of the most prosperous little cities on the coast.

It is a large shipping point for grain, fruits and vegetables of all kinds, and is the home of the asparagus, no finer or better being raised on the American continent.

## MARTINEZ ABSTRACT & TITLE CO.

The Manager of the Martinez Abstract & Title Co. has had 15 years experience in the Abstract business.

The Rectigraph system is used by this Company.

STEGE

287

One of the prettiest small towns of the county is Stege. It is located close to the Alameda County line, only a few miles out from Berkeley and Oakland. It has many handsome homes, a nice new school building, a fuse and cap factory, a match factory and chemical works. Has postoffice and telephone service, nearest banking town Richmond.

## The Best Real Estate Investment in California

**L**OOK at the picture—STUDY IT CAREFULLY—it tells a great deal to the man who THINKS and OBSERVES. Here is a great DEEP WATER CANAL extending inland from the Bay of San Francisco to a point equidistant from the two built-up sections of fast-growing Richmond, California.

The Canal will accommodate the ferry boats from San Francisco, and great ocean going vessels that will dock along side the tracks of three transcontinental railroads—the Santa Fe, the Southern Pacific and the new Western Pacific. At the point where the Canal ends is the "Heart of Richmond," which is to be the active business center of this city of 10,000 population.

To-day you can buy property in this "Heart" for as low as \$18 per front foot, on easy terms—10 per cent down and only 1 per cent of the balance a month—no interest, no taxes

The business property of other cities with 10,000 population is worth from \$500 to \$1000 a front foot. In Seattle to-day lots 50x100 feet located on the water front and not yet filled in, cannot be bought for less than \$10,000 to \$20,000. In Richmond you can

get water-front property for as low as \$900 a lot. Buy now, hold on to your property—it will soon bring you an income, or you can sell at a great advance in price.
